

PUBLIC-SECTOR APPLICATION & CLOUD MODERNIZATION

ENGINEERING TRUST. DELIVERING IMPACT.

Altovector delivers end-to-end cloud modernization for legacy government systems, addressing integrations, secure access, data, and user workflows that surround them. Our senior-led approach increases productivity, reduces maintenance, and supports scale and growth - while minimizing downtime and protecting operational continuity.

PRINCIPAL-LED. PUBLIC-SECTOR FOCUSED.

Senior leaders stay hands-on from planning through delivery.

**WHAT WE DELIVER**

Mission-critical modernization, delivered with focus

CLOUD MODERNIZATION ASSESSMENT / CYBERSECURITY & CLOUD READINESS / AI & DATA DISCOVERY

**MODERNIZE CORE SYSTEMS**

Legacy infrastructure assessment, Azure migration, platform engineering, and workload transformation: rehost, replatform, refactor, or retire.

**CONNECT THE ENTERPRISE**

System integrations and APIs; identity and access management; security guardrails; compliance and governance; data pipelines.

**OPTIMIZE WITH DATA & AI**

Analytics; data transformation; AI-enabled workflows; knowledge management; reporting and decision support.

RESPONSIVE WHEN IT MATTERS. ACCOUNTABLE THROUGH DELIVERY.

Results focused | Clear ownership | Proven execution | Direct accountability

RELEVANT LEADERSHIP EXPERIENCE**Federal cloud modernization**

10 servers and 8 .NET applications migrated to Azure IaaS, with identity modernization and operational continuity.

Statewide public-sector systems

Technical leadership for data certification and accountability systems serving 120 districts and approximately 1,500 schools.

High-volume data engineering

SSIS and SQL Server ETL designed for files containing more than 6 million records.
